

**Is your
computer
SAFE?**

10 TIPS to do TODAY!

- ①** Use “anti-virus software” and keep it up to date.
- ②** Don’t open emails or attachments from unknown sources.
- ③** Protect your computer from Internet intruders – use “firewalls.”
- ④** Regularly download security updates and “patches” for operating systems and other software.
- ⑤** Use hard-to-guess passwords. Mix upper case, lower case, numbers, or other characters not easy to find in the dictionary, and make sure your password is at least **eight** characters long.
- ⑥** Back-up your computer data on disks or CDs regularly.
- ⑦** Don’t share access to your computer with strangers. Learn about file sharing risks.
- ⑧** Disconnect from the internet when not in use.
- ⑨** Check your security on a regular basis.
- ⑩** Make sure your family members and/or employees know what to do if your computer becomes infected.
